

Installation of JUPITER IDEAL EPS system using S.R.T. system as a substrate to an adhered high quality engineered timber floor.

Screed Replacement Tiles installed as a floating floor over the JUPITER IDEAL EPS system.

Schotten & Hansen engineered timber floors being prepared for gluing to Screed Replacement Tiles with Sikabond T-54.

T&G ends of timber are fixed using wood adhesive.

Screed Replacement Tile system provides a solid, level substrate for both the timber floor and in this case stone floor.
