

Post installation guidelines Screed Replacement Tile

Once installed the Screed Replacement Tile system requires 48 hours to completely cure.

DO's

The system can be used as working surface if the following precautions are observed.

The floor system is capable of accepting regular, normal site foot traffic

Towers and scaffolding to be erected on 1 x 18mm ply

Pallet trucks with load should be used only on 2 x 18mm ply

Scissor lift and cherry pickers only on 2 x 18mm ply and driven SLOWLY

DO NOT's

Pallet trucks of ANY kind should be not used directly on the system

DO NOT apply heavy / point loads at the edge of the system

DO NOT allow scissor lifts, cherry pickers without 2 x 18mm ply

DO NOT proceed with final floor installation on damaged or loose tiles

DO NOT allow any foot traffic on the system before the 48 hour cure time

Cherry pickers permissible to 2 tonnes with additional layer of 2 x 18mm ply.

Scissor lifts permissible to 2 tonnes with additional layer of 2 x 18mm ply.

Do not apply loads at edge of system. Warning tape should be used

Towers and scaffold should be erected on 1 x 18mm ply sheet
